Forecast for Tuesday 07 May 2024

Weather: A fairly cloudy start, with a chance of drizzle in the north during the early hours. However, things will quickly brighten up around dawn, the cloud breaking into sunny spells and a few showers, these mainly light and to the south of the park. Showers will die out in the latter part of the afternoon, the sky becoming mostly covered with cloud in the evening.

Chance of cloud-free hill tops above 800m: 20% improving to 80% or more during the morning.

Low Cloud and visibility: Very poor initially, with cloud as low as 400m and covering summits. Cloud lifting just above summits during the morning, the visibility becoming largely good but temporary mediocre in and around any showers, with cloud bases briefly down to 800m.

Meteorologist's View

A bit chilly around summits but feeling muggy at lower levels. Stay hydrated.

Forecast for Wednesday 08 May 2024

Weather: Some light winds and clear skies overnight, leading to a risk of mist and fog patches. These will quickly clear though, leading to variable cloud and periods of hazy sunshine. An afternoon shower is possible but it will remain dry much of the time.

Maximum wind: South to Southwest 10-15mph.

Chance of cloud-free hill tops above 800m: 85% becoming 95% or more.

Low Cloud and visibility: A risk of mist and fog patches at first but visibility generally good to very good.

Temperature: **Valleys:** Plus 11 Celsius becoming plus 16.
At 800m: Plus 06 Celsius becoming plus 11.
Freezing level: Above summits.
